# Mega Moisture Mist

## On the go Moisturizer

This is a revelation, a multi-tasker, a life-saver. We mixed ocean water with a host of sea enzymes and sun protection to create a mist that you can spray on your body, your face (even over make-up!), your hair, after shaving, before and after surfing or swimming, any time, any place. It restores moisture and protects your skin in one quick refreshing spritz. Oh, and it smells divine too.

Formulated with all-natural ingredients, it has a Rosemary mint scent. Ethylhexyl Methoxycinnamate sounds scary but it's actually a free radical exchanger and maximum skin protector with UVA/UVB protection

### USAGE:

Spray on your body, your face (even over make-up), your hair, after shaving, before and after surfing or swimming, or any time.
